

Net Zero Energy (NZE) Housing Workshop:

Building the Market for Net Zero Homes

Municipal Leaders Forum
November 8, 2016

Agenda

- Introduction
- Mapping the Road to Net Zero with VUCA
- Voluntary Programs & Incentives
- Innovative Financing Mechanisms
- Technology Pathways & Implementation
 - New Homes
 - Retrofit
- Home Buyer Trends
- Capacity Building

EnerQuality

Canada's #1 certifier of energy efficient homes and the market leader in residential green building programs.

Residential Green Building Programs

Certification

ENERGY STAR®, EnerGuide, Net Zero,

BETTER BUILT HOMES™

Agenda

- Introduction
- **Mapping the Road to Net Zero with VUCA**
- Voluntary Programs & Incentives
- Innovative Financing Mechanisms
- Technology Pathways & Implementation
 - New Homes
 - Retrofit
- Home Buyer Trends
- Capacity Building

2016 – 2030 Net Zero Homes Challenges & Opportunities

- Ontario Building Code Updates (OBC 2017-2030)
- New Energuide (ERS) Rating System 2017 Updates
- Ongoing ENERGY STAR for NEW HOMES 2017-2030 Updates
- Net Zero Homes with EV, Storage, and Distributed/Community Power Generation
- New Low Carbon/EE Technologies (Mainstream, Emergent, Undiscovered)
- New Provincial DSM/CDM Programs & Incentives
- New Federal Programs (e.g. New 2017 Federal Home Retrofit Incentives)
- Innovative Financing Mechanisms
- Inter-agency Provincial Coordination (IESO, MMAH, MOE, Green Bank, MOECC, Municipalities, LDCs, Gas Utilities)
- Evolving Economic Trends
- Evolving Home Buyer Trends
- Evolving Municipality Trends
- Capacity Building & Training for Builders and Consultants
- Downstream Capacity Building (Trades, Sub-contractors, Suppliers)

Proven Strategies to Address VUCA

Agenda

- Introduction
- Mapping the Road to Net Zero with VUCA
- **Voluntary Programs & Incentives**
- Innovative Financing Mechanisms
- Technology Pathways & Implementation
 - New Homes
 - Retrofit
- Home Buyer Trends
- Capacity Building

Voluntary Programs & Code

The EnerGuide Rating System
provides the baseline for building
codes and voluntary programs

NET ZERO ENERGY
PRODUCES AS MUCH
ENERGY AS IT CONSUMES

R-2000 50% BETTER THAN CODE

20% BETTER THAN CODE

HOUSE BUILT TO CODE

R-2000/Net Zero Energy

R-2000 = 30+ years of research and innovation

R-2000 accounts for 22% of energy efficiency improvements in the market since 1980

14,800 of these leading edge homes certified

Relevant Programs & Incentives

New Construction Incentives

- MOECC/Green Bank Homebuyer Incentives
- EGD Savings By Design Program
- IESO Residential New Construction Incentives
- CMHC Rebates
- Net Metering Rates
- Low Income Programs
- Equipment Incentives
- Municipal Programs/Bonuses?
 - Water Conservation Incentives
 - Storm Water Management Incentives

Retrofit Incentives

- Federal Retrofit Incentives
- HERD
- UG Home Reno Rebate
- EGD Home Energy Conservation Program
- IESO Whole Home Retrofit Incentives
- Net Metering Rates
- Low Income Programs
- Equipment Incentives
- Municipal Programs?
 - Water Conservation Incentives
 - Storm Water Management Incentives

Agenda

- Introduction
- Mapping the Road to Net Zero with VUCA
- Voluntary Programs & Incentives
- **Innovative Financing Mechanisms**
- Technology Pathways & Implementation
 - New Homes
 - Retrofit
- Home Buyer Trends
- Capacity Building

LIC Overview

- **LIC** financing **used**: sewers, sidewalks, buried utilities
- Ontario Ministry of Municipal Affairs and Housing **LIC regulatory change** in 2012: also: private **energy, water efficiency**
- LIC program design: **all admin costs (marketing, interest, admin) recovered.**
- **LICs** implemented for **retrofits** to **existing homes** in **7 municipalities**:
 - **City of Toronto**: energy/water
 - **City of Halifax, N.S.**: solar thermal, water
 - **Town of Berwick, N.S.**: air source heat pumps
 - **Four Municipalities, N.S.**: energy efficiency retrofits

LIC Benefits

- LIC removes financing barriers to energy efficiency:
 - Financing is up-front.
 - Longer-term **fixed-rate** financing: e.g. **10, 15, 20-year terms**.
 - Makes energy/water efficiency affordable: annual **savings match** annual **payments** due to **longer terms**.
 - **New owner continues payments on LIC balance** on sale.

Agenda

- Introduction
- Mapping the Road to Net Zero with VUCA
- Voluntary Programs & Incentives
- Innovative Financing Mechanisms
- **Technology Pathways & Implementation**
 - New Homes
 - Retrofit
- Home Buyer Trends
- Capacity Building

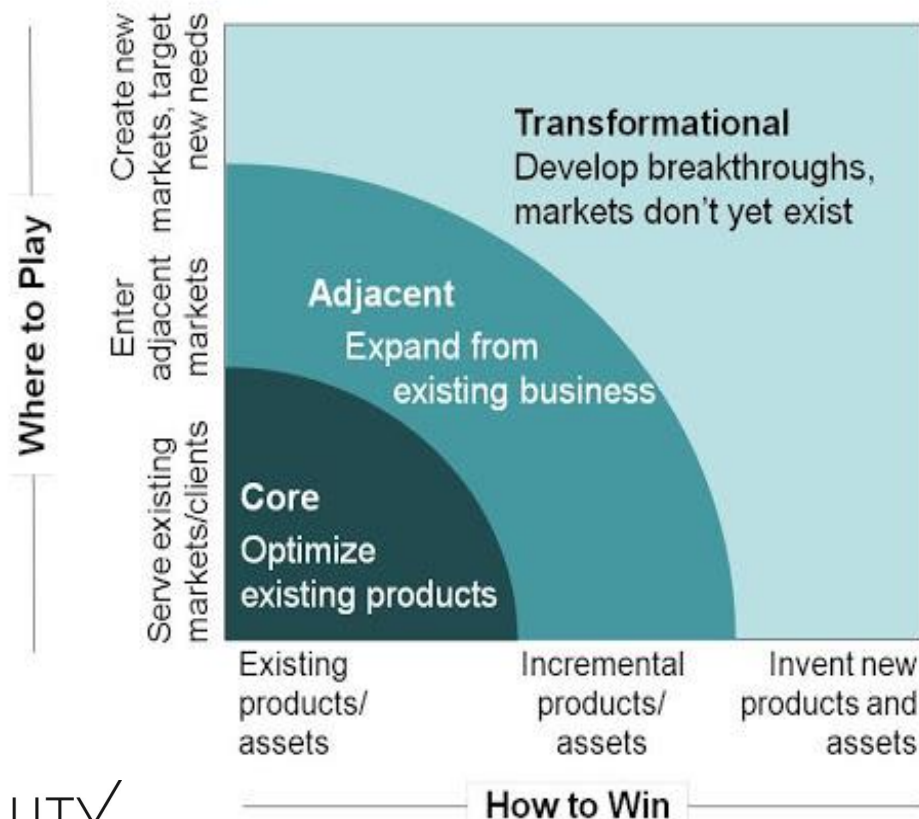

Moving Forward into the Mainstream

- Innovative Financing Mechanisms
- Technology Pathways & Implementation
 - New Homes
 - Retrofit
- **Home Buyer Trends**
- Capacity Building

New ideas & technologies

“How do I get my products into the market?”

“Energy conservation is important”

Consumers & Home buyers

“Only if I can afford it and/or it makes sense”

New home builders

“Only if consumers are willing to pay for green features”

Metrics

*i.e. can be quantified &
measured easily and
conveniently*

Value = rational benefit x emotional benefit
price

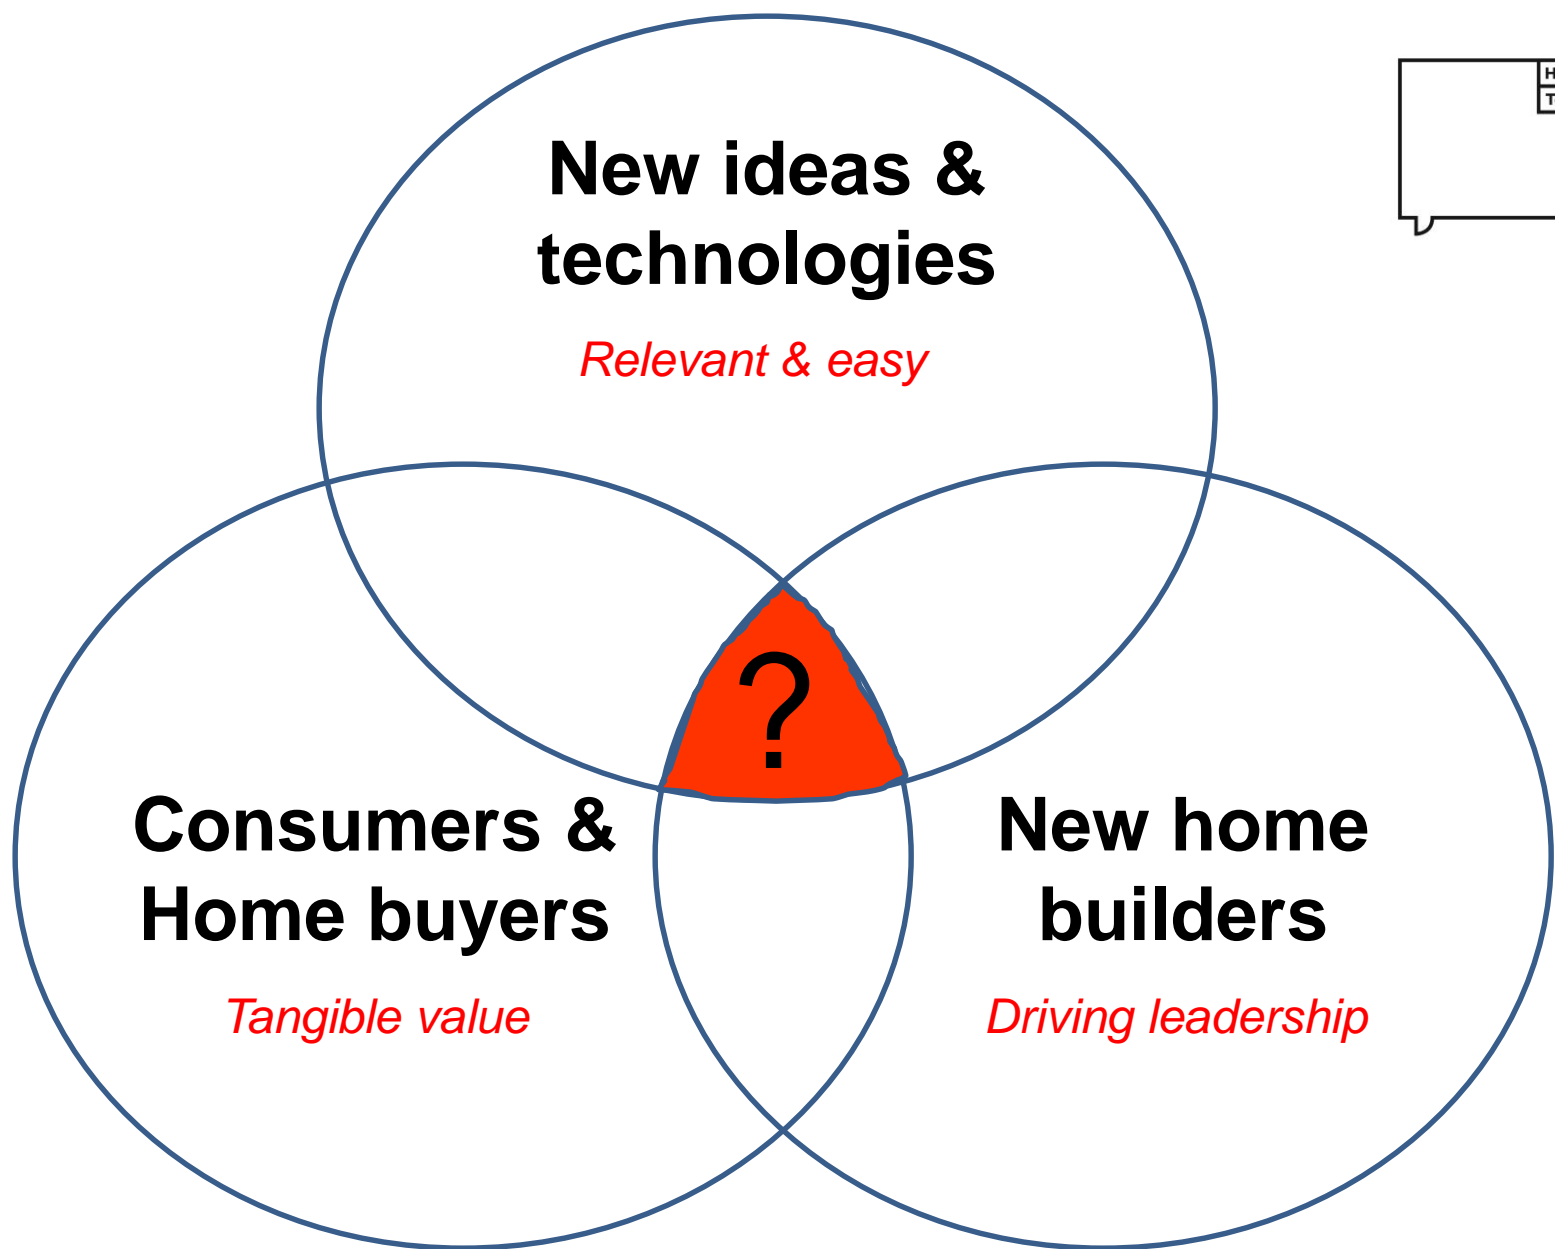

Affordable

*i.e. price is
accessible for
most*

Makes me feel good

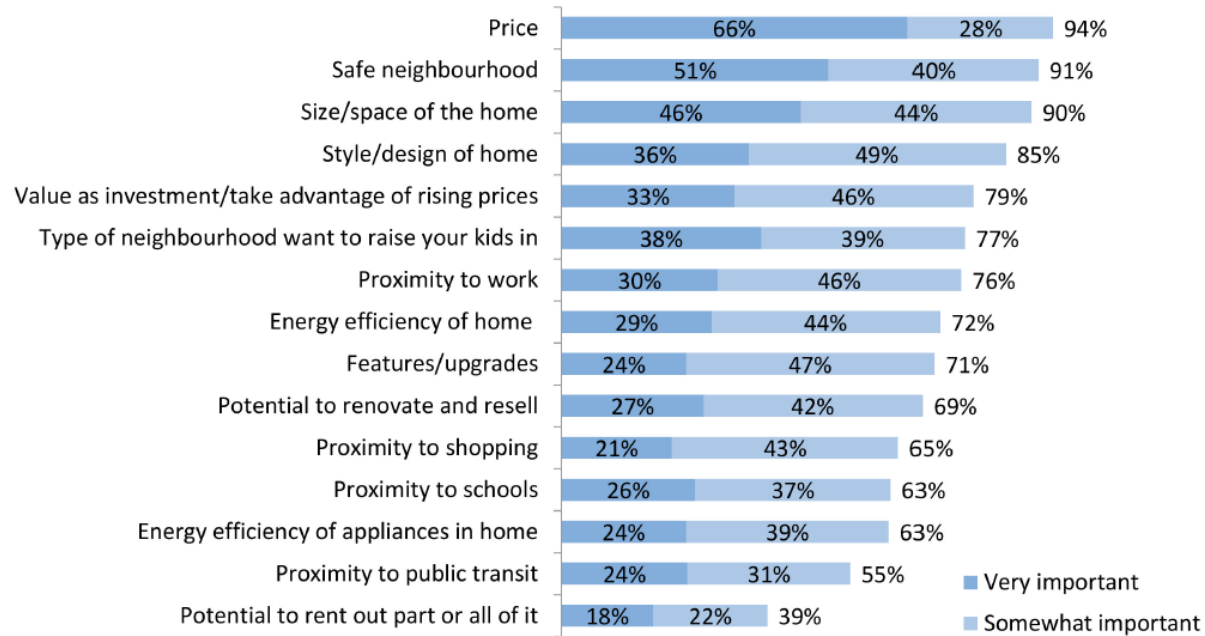

*i.e. being green is
good for environment*

Consumers & Home Buyers are Key

How do we get there?

2015 Environics-Genworth First Time Buyer Survey

Q15. How important were each of the following as reasons for why you chose your current home?

ENVIRONICS

CMHC EQuilibrium Homeowner Survey

The experience of living in a sustainable home included:

- Better **comfort** and an improved lifestyle;
- Availability of ample natural light throughout the home;
- Superior insulation and **soundproofing** from home design, triple- and quadruple-pane windows;
- Ability to **control** the home's temperature using natural light and ventilation;
- **High-quality** floor, wall and ceiling insulation;
- Heating and ventilation systems that provide a **comfortable level of humidity** and prevent the growth of mold;
- Better indoor air quality with less dust and **fewer allergic reactions**;
- Durable and **low-maintenance construction**; and an efficient layout that maximizes usable living space and creates a spacious, esthetically pleasing environment.

New CHBA Net Zero Branding

The ultimate standard for comfort and efficiency

What is a Net Zero Home?

Net Zero Homes produce as much clean energy as they consume.

They are up to 80% more energy efficient than typical new homes and use renewable energy systems to produce the remaining energy they need.

Every part of the house works together to provide consistent temperatures throughout, prevent drafts, and filter indoor air to reduce dust and allergens.

The result: exceptional energy performance and the ultimate in comfort – a home at the forefront of sustainability. It all adds up to a better living experience.

GENERATIONAL SIZE MATTERS

	Millennials	Generation X	Boomers	Pre-Boomers
Born	1981-2000	1966-1980	1946-1965	Before 1946
Age in 2015	15-34	35-49	50-69	70 and older
Population in 2015	9.5M	7.2M	9.5M	3.9M
% of Population	27%	20%	27%	11%
% of Labour Force	37%	31%	30%	1%
Households in 2015	2.8M	4.1M	5.6M	2.1M
% of Households	19%	28%	38%	15%

Agenda

- Introduction
- Mapping the Road to Net Zero with VUCA
- Voluntary Programs & Incentives
- Innovative Financing Mechanisms
- Technology Pathways & Implementation
 - New Homes
 - Retrofit
- Home Buyer Trends
- **Capacity Building**

How will CHBA pass on the knowledge?

Educational initiatives to accelerate builder capacity to capitalize on NZE:

- NZE Building Science Training - Nov 2-3 inaugural session (piloted with 200+)
- NZE Energy Advisor Training – Jan 2017
- NZE Sales Training - Jan/Feb 2017
- NZE Builder Boot Camp - May 2, 2016 (108 participants) *next in 2018*
- NZE Networking & Exchange - currently for Council Members only
- NZE Webinars - Jan, Feb, Apr, May 2017 (5 recordings from 2016 webinars)

The NZC Education Working Group is conducting a needs assessment and gap analysis - and will work with key stakeholders to develop more educational opportunities.

About Us

EnerQuality, founded in 1998, designs and delivers **green building, certification, incentives, training, and market transformation programs** to the residential construction industry. EnerQuality's programs are voluntary and market-based. We partner with local homebuilders associations, governments, utilities, manufacturers, and consultants to bring our programs to market.

ENERGY STAR for NEW HOMES (ESNH) is celebrating the 11th anniversary of its launch in Canada. In 2005, EnerQuality developed and piloted ESNH in Canada – the most successful green building program - and remains the primary certifier of ESNH, R-2000, and ENERGUIDE homes with **80,000** homes certified to date under all three NRCan standards.

EnerQuality delivers utility energy efficiency incentive programs across Ontario for gas and electricity utilities. We host an annual **EQ Awards** Dinner celebrating the sustainability leaders in residential homes/condo construction industry. We also host the annual **EQ Housing Innovation Forum** where leading builders and subject matter experts showcase housing trends, technologies, builder best practices and lessons learned.
