- **Will be in Council Chambers**
- **Name tags will be available in Members lounge near the coffee**
- **Name tags and reserved spots will be in the first row of council chambers for municipal council reps (name tags for them will also be at the name tag table as well – there will be duplicates for them – one at name tag table and another at their reserved spot)**
- **Gaby will be MCing the event**

Goals for the Clean Air Council Summit

- To increase awareness of the Clean Air Council with provincial and federal departments and representatives
- Invites and Clean Air Council book has gone out to all CAC council members, MPPs and MPs in the CAC catchment
- Has also gone out to non CAC member municipality councils (across the GGHS and into SWO and eastern Ontario) to increase their awareness of the Clean Air Council network
- To bring together federal, provincial and municipal leaders to speak to their efforts on clean air and climate change and the need for working across government silos and between different levels of government
- To spread the message of the linkage between the low carbon transformation and our region's economic competitiveness
- The linkage between low carbon communities and increased livability and other co-benefits
- Increasing awareness of the upcoming actions of the Clean Air Council

Upcoming Clean Air Council Meetings

- [June 23rd Clean Air Council Meeting \(Theme: Transform TO - Climate Change Actions Modelling\)](#)
- [June 27th Environmental Programs Workshop](#)
- [September 15th, Green Fleets Workshop](#) (will be at the new EV Discovery Centre at Dufferin and Finch)
- September 22 Clean Air Council Meeting (Bio and Renewable Gas)
- October 20th Growth Plan Implementation Workshop
- October 27 CAC Meeting (Regional Transportation & Freight)
- November 10th Health Vulnerability & Resilience Workshop
- November 24 CAC Meeting (Community Energy Financing)

Summer Activities

- Green Development Standards COP and Scan
- Green Procurement Scan Update (Webinars and Interviews)
- Ontario Building Code Consultation
- Air Quality Monitoring and Modeling (possibly in the fall but will see about doing this over the summer)
- Improving Collaboration Strategies and Techniques workshop

School Environmental Programs Workshop

The goals of the workshop are to:

- hear how the inventory can be made to be of most use to target audience (teachers and ecoteams)
- highlight the programs that lend themselves to transferability
- address transferability issues and interest
- identify gaps in programming and see about the interest in joint development of programs to address gaps.
