Carbon Neutral Nottingham 2028

# Use of ClimateView to accelerate delivery

**Rachel Unwin**

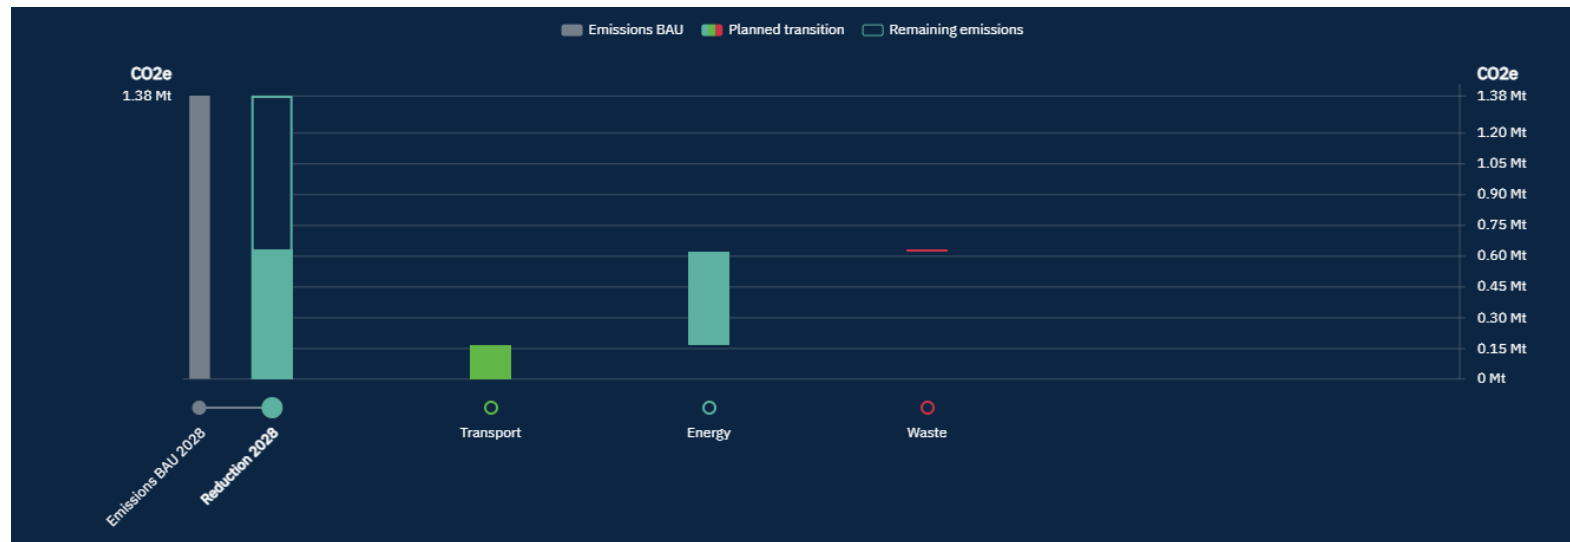

**Nottingham City Council, Senior Carbon Neutral Policy Officer**

# ClimateView progress

- Have set 'optimistic' transition targets with themes
- Parameters locally set where possible
- CN28 Action Plan linked to transition targets
- Bottom-up emissions inventory for Nottingham

# Gap awareness

- 'Optimistic' view of what is possible within Nottingham policy context – above and beyond action delivery within CN28 Action Plan
- Half of emissions reductions needed before 2028
- Gap awareness

# Accelerating delivery

- Greater ‘enabling’ shifts are needed, in order to maximise reductions from other activities & actions within CN28 action plan.
  - E.g. Retrofit to higher standards (target stretch)
  - E.g. Increase activity shifts (increase transition targets)
- Creating ‘scenario pathway’ in which carbon neutral can be reached
- Monitor progress against bottom-up inventory
