

Ajax Council seized the opportunity to work collectively to accelerate climate action. The pledge aligns with Ajax Council's 2019 climate emergency declaration and establishment of new corporate GHG emission reduction targets in 2021, including a 100% GHG emissions reduction (below 2019 levels) by 2050 as outlined in the motion passed by Council.

Dealing with climate change is not exclusive to just the large metropolises, but rather inclusive of every city, town and district to collaborate in their efforts to reach the goals that ensure a sustainable and healthy future. We encourage other municipalities to follow suit, take action and join C40 Cities.
