

What are The Challenges to Advancing EV Workplace Charging Policy?

Funding

LACK OF UNDERSTANDING OUR NEEDS AND OUR POWER CAPABILITIES

lack of understanding in terms of usage

We need one in place to address challenges of an increase in EV drivers both in our fleet, community and workplace

Maximum charging times, connected app, maintenance requests, policy enforcement for non-compliance

Funding

Who is responsible for what?

Buy-in from facility managers

Supporting facility infrastructure

What are The Challenges to Advancing EV Workplace Charging Policy?

Understanding roles and responsibilities of different departments

Coordination between different departments at the City (e.g. facilities vs. fleet)

Technical know-how

Unsure - early on in process

What are the Existing Opportunities to Advancing EV Workplace Charging Policy?

Corporate Standard that requires EV stations in new facilities

SOME FUNDING

demand from the public

Available federal funding

Demand from Council, to address our climate change commitments

support from upper management

ZEVIP funding

Funding

Demand from employees

What are the Existing Opportunities to Advancing EV Workplace Charging Policy?

Support from council

Utilization of existing chargers

Vehicle EV market options are improving

Reduce scope 3 emissions

High fuel prices, carbon neutral goals

Council buy-in

ZEVIP funding

Carbon neutral targets to support electric mobility

Higher level government funding

What are the Existing Opportunities to Advancing EV Workplace Charging Policy?

Chargers can be used by staff, fleet or public - time of day
