

# How satisfied are you with this consultation process?

# What did you appreciate about this consultation?

10 responses

That the IESO reached out to municipalities

ability for open discussion for complex issues

Knowing what's upcoming to help planning for future work.

ability to have input before fund criteria etc. finalized

CAP's strong facilitation skills

Excellent discussion. Would love to have more of this in the future on zoom or in person

ability to provide input early in the process

identifying consistencies for ongoing issues to address with IESO/municipalities

Consulting with Municipalities

# What did you appreciate about this consultation?

10 responses

I think some basic background would have helped

# What would have improved the consultation process/outcome for you?

10 responses

Materials in advance

getting IESO background info ahead of time

LDC perspective

Having more background

A basic 101 overview prior

Brief document or outline provided in advance.

more information in advance so we can better comment

+1 on LDC perspective at the same time munis are in the room

potential brainstorm sessions about actual projects municipalities are trying to implement and see how our feedback can assist the implementation of these

# What would have improved the consultation process/outcome for you?

10 responses

How this program fits into the larger picture

# What additional discussion do you think would be good for the IESO and municipalities to have?

8 responses

Distributed energy resources

What analysis have the utilities done on potential tax credits from clean energy projects?

how to support deploy renewables at municipal facilities that fall outside federal incentives

The Municipal Support resolutions / template.

Grid capacity for electrification of Municipal buildings to achieve net zero.

how to "fix" transmission constraints at the transformer station level holding back net-metering

Fund feasibility analysis for renewable energy infrastructure (ie methane capture / Co-gen systems)

Distributed energy resources
